

SDLC Task - 1

Name :- Turpat Dinesh
Roll :- 2141011200

Objective : create a simple use-case diagram for a library management system.

A Library Management system is a software that helps manage the daily activities in a library, like issuing books and managing members.

There are two main actors in this system.

- Librarian - manages book check-out.
- member - Borrows and returns book.

Main use cases include:

- Check out Book - Done by both Librarian and member
- Return Book - performed by the member.
